

LabLink Decontamination Form

Complete this form before transferring laboratory equipment through LabLink.

Donors must confirm that the equipment has been assessed, cleaned, and prepared according to:

1. institutional EHS procedures
2. equipment-specific SOPs
3. biosafety and hazard-control requirements

Reference guide: [NIH DOHS Decontamination](#)

Before you certify:

- Remove or identify residual biological, chemical, and radiological materials.
- Clean accessible surfaces, compartments, and detachable parts.
- Label remaining hazards, damaged components, or handling restrictions.
- Confirm whether manuals, maintenance logs, or service records are included.

☐

I confirm that I reviewed the applicable EHS, SOP, and biosafety requirements before releasing this equipment.

Describe the decontamination steps completed.

Residual hazards, contamination concerns, or handling restrictions

☐

I disclosed any remaining hazards, restrictions, or special handling requirements in the LabLink listing.
